FOREWORD

THE 1965–66 edition of THE WORLD OF LEARNING once again records a great expansion in academic and cultural life throughout the world, and although it may be true that progress is now occurring at a steadier rate, with a greater emphasis on consolidation in the more developed countries, it is equally true to say that on a smaller scale the less developed countries are fast catching up.

In this edition of THE WORLD OF LEARNING many new features have been introduced, partly to rationalise the material and partly to bring the reader more quickly to the information he is seeking. Under Denmark, France, the Federal Republic of Germany, Great Britain, Italy and the United States of America, it will be noticed that the sections on Learned Societies and Research Institutes have been classified systematically by subjects, with the institutions arranged alphabetically by title within each division or sub-division of the classification. It is hoped to extend this scheme in future editions to cover all the principal countries in the book.

Another noteworthy feature of the new edition is the rearrangement, for most countries, of the university and college sections into three columns. This has not only achieved an economy in space (very necessary considering the rate at which the volume of material expands annually), but also a compactness of style. Uniformity of presentation has also been considered carefully and it will be observed that in the university and college sections initials have, for the most part, been used rather than Christian names or fore-names. Where possible women's first names have been retained, however. Except in medical faculties, bachelor degrees have been omitted if the person listed holds a more senior degree (master's or doctor's). To add clarity to the presentation of the professor lists, the subjects taught are no longer enclosed in brackets, but listed after a comma.

More than 1,500 institutions have been added to the present edition, and of this total 625 are American colleges. Some 1,100 American universities and colleges are now listed and for 100 senior institutions a list of full professors has been included.

Every effort has once again been made to ensure that the text is as up to date and accurate as possible. This could not be achieved without the help of innumerable contributors. To them, we take great pleasure in offering our very sincere thanks.

December 1965.

UNESCO

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANISATION

AIMS AND FUNCTIONS

(*Article 1 of Unesco Constitution*)

The purpose of the Organisation is to contribute to peace and security by promoting collaboration among the nations through education, science, and culture in order to further universal respect for justice, for the rule of law, and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language, or religion, by the Charter of the United Nations.

To achieve Unesco's purpose, the General Conference adopts at its biennial sessions a basic programme which stresses the main ideas underlying the aims of the Organisation and gives coherence to the detailed work plans. While the latter naturally vary from year to year, the basic programme covers the policies and main lines of work, with little change except of emphasis on this or that sector. Thus from 1965 onwards the scientific sectors (both stimulation of research and application of science to development) are to receive a priority second only to that accorded to educational activities in 1962.

The chief tasks of Unesco, as defined in its basic programme, are as follows:

1. To eliminate illiteracy and encourage universal free and compulsory education;

2. to obtain for each person an education conforming to his aptitudes and to the needs of society, including technological training and higher education;

3. to promote, through education, respect for Human Rights throughout all nations;

4. to overcome the obstacles to the free flow of persons, ideas, and knowledge between the countries of the world;

5. to promote the progress and utilisation of science for the benefit of all mankind;

6. to focus the social sciences on the study of particular social questions for the benefit both of the general public and of governments;

7. to assure the preservation of the world's inheritance of books, works of art and monuments of history and science, to make this cultural heritage known and available to all, and to promote mutual appreciation of differing cultural values;

8. to advance through the media of mass communication the causes of truth, freedom, and peace;

9. to bring about better understanding among the peoples of the world and to convince them of the necessity of co-operating loyally with one another in the framework of the United Nations;

10. to provide clearing-house and exchange services in all its fields of action, together with technical aid to nations and peoples in emergencies.

REGULAR PROGRAMME

1. DEVELOPMENT OF INTERNATIONAL CO-OPERATION

Unesco aims to maintain, increase and diffuse knowledge and to encourage co-operation among the nations in all branches of intellectual activity. The League of Nations set up its International Committee on Intellectual Co-operation for the same purpose, and Unesco took over this heritage in an attempt to restore contacts broken by the Second World War. It was realised that an effective and economical method would be, first, to support existing specialist organisations, and second to encourage individual scientists, scholars, writers and artists.

The natural sciences was the first sphere in which Unesco was able to co-operate with an already firmly established body of scientific associations. Unesco's success in this field prompted action where contacts at international level were less advanced. To achieve this a number of institutions were created: the International Council for Philosophy and Humanistic Studies, the International Theatre Institute, the International Music Council, the International Association of Plastic Arts. Unesco also decided to support the work of the International PEN and the International Union of Architects. The International Council of Archives was founded on the initiative of Unesco. Financial aid is given to the International Council of Museums, the International Federation of Library Associations and the International Federation of Documentation.

In the field of social sciences, Unesco promoted the establishment of international bodies in such major disciplines as sociology, political science, legal science and economics. Subventions have been granted to a few carefully-selected associations, including the International Economic Association, the International Statistical Institute, the International Sociological Association. The International Social Science Council and the International Committee for Social Sciences Documentation were also helped.

In the field of education, financial assistance has been given to the World Confederation of Organisations of the Teaching Profession, the International Association for Teachers' Federation, the International Association for Vocational Guidance, the World Organisation for Early Childhood Education, the New Education Fellowship, etc. A major step was the creation in 1950, with UNESCO's help, of the International Association of Universities. Subventions have also been granted to the International Bureau of Education for its documentation services.

In the field of mass communication, Unesco has found that associations have more varied activities and less well defined programmes. It has founded the International Centre of Films for Children, the International Association for Mass Communication Research, the International Film and Television Council.

Unesco also organises seminars, international discussions and conferences, for example the International Conference on Information Processing in June 1959, the Intergovernmental Conference on Oceanographic Research in July, 1960, the World Conference on Adult Education, Montreal, in August 1960, and the International Conference on Youth, Grenoble, in August 1962.

2. IMPROVING DOCUMENTATION

These activities include the collection, analysis and diffusion of information and statistics, and the encouraging of other organisations to do similar work. Since 1948 this has been increasingly achieved through the Education Clearing House.

Unesco has also built up a documentation and information service on opportunities and facilities for study abroad. The annual publications *Study Abroad* and *Vacations Abroad* bring such facts to a wide public. A Unesco *Handbook of International Exchanges* is also published.

The Clearing House in Mass Communications collects information on mass media techniques and the technical needs of mass media institutions.

In the field of culture Unesco has produced the *Index Translationum* and archives of colour reproductions of paintings. In the Social Sciences bibliographies have been produced in four major fields, sociology, political science, economics and social and cultural anthropology. Multilingual dictionaries and biographies are being prepared and attempts have been made to standardise techniques and terminologies. A study has also been made of scientific and technical dictionaries and a bibliography of monolingual glossaries has been produced.

Unesco also promotes the creation of scientific and technical documentation centres in order to meet the essential need of scientists and technicians for information on the work of their colleagues elsewhere.

Altogether, 36 national centres for the international exchange of publications are linked with Unesco. One of the chief aims of the International Centre for the study of the Preservation and Restoration of Cultural Property, newly set up in Rome, is to collect, analyse and distribute information concerning scientific and technical problems arising in the fields of preservation and restoration. Similarly the Documentation and Study Centre for the History of Art and Civilisation in Ancient Egypt is now in full operation.

The primary purpose of the Unesco library is to aid the Secretariat in carrying out the programme by providing the necessary documentation. It also serves members of the permanent delegations, of the Executive Board and of delegations to the General Conference. The library has 115,000 vols. and 255,000 pieces—mostly documents—in the Archives.

3. SCHOOL EDUCATION

The Unesco programme for school education may be divided into five main parts, Free and Compulsory Education; the School Curriculum and Improvement of Education; Education for International Understanding and Co-operation; Vocational and Technical Education; and Higher Education. An essential concomitant to all these is the need for a programme of educational planning.

At least forty-five per cent of the world's population of fifteen years and over cannot read or write and in some of the developing countries this figure is as high as eighty-five per cent; forty-five per cent of the world's children of school age do not attend school. Of those who do attend school, many are poorly educated because of inadequate facilities, undertrained teachers and an outmoded curriculum. It is, in addition, realised that the need for humanistic studies and for education for international understanding has never been so great. Recent developments in science and industry have also created new problems in higher education or have accentuated old ones.

Free and Compulsory Education. For more than ten years Unesco has conducted a campaign to extend free and compulsory education to all children of primary school age. A series of international and regional conferences was organised; direct assistance was offered to Member States in the form of experts and of fellowships for national educators. The first major effort for training teachers was launched in 1957 as Unesco's Major Project for the Extension of Primary Education in Latin America. The Project concentrates upon teacher training and educational planning, and is now in full operation.

In addition, three major conferences into the educational needs of tropical Africa, the Arab states, and South and South-East Asia, were completed, as a result of which the General Conference, in December 1962, decided to give priority to educational programmes. This was again confirmed by the last session of the General Conference in 1964. Out of a total of nearly $49 million for Unesco's regular budget during 1965–66, about one-quarter ($11.3 million) was devoted to education. In addition, nearly $22 million was made available for educational purposes from the UN Special Fund activities (see below). The $4 million emergency programme for Africa financed out of voluntary contributions was due to end in 1965.

The School Curriculum and the Improvement of Education. In 1954 a programme for the Improvement of the School Curriculum was initiated by the creation of an international advisory committee, by the holding of regional seminars, by providing the services of experts, by disseminating information on mechanisms of curriculum revision, curriculum research, etc., by initiating an inquiry into the adaption of the school curriculum to the age and development levels of children. In 1960 Unesco completed an inquiry into the role and place of the humanities in school education. Two outside bodies are closely associated with UNESCO in this field: the International Bureau of Education at Geneva, and the Institute of Education at Hamburg.

Education for International Understanding and Co-operation. Unesco seeks to stimulate interest in educational activities by facilitating international exchanges of ideas among educational leaders and teachers, in aiding in the development of better methods and materials and in encouraging action within schools on many aspects of education for international understanding.

Vocational and Technical Education. Activity in this field has led mainly to the provision of services of experts, fellowships and equipment. Regional conferences and training courses on Vocational and Technical Education have recently been organised. Stress has been placed in many regions, particularly in Africa, on more agricultural education, starting from the primary level.

By an agreement reached in 1960 between UNESCO and the International Labour Office, two new international instruments have been completed, the UNESCO one dealing with technical education in school and the ILO one with vocational training after or out of school.

Higher Education. Work in this sphere is carried out mainly through the International Association of Universities, created in 1950. A scheme of collaboration on a large scale started in 1960 with some of the American Foundations on the subject of access to universities.

Educational Planning. As a background to all education, it has been increasingly realised that educational planning is unquestionably a necessity in the world today, not only because of the tremendous economic, technical and intellectual effort involved in all educational work, but for a more fundamental reason—because of the speed with which it is developing and its growing complexity. Unesco furnishes Member States with three forms of assistance in this field. Firstly, the Organisation advises governments on planning methods and procedures. Secondly, Unesco sends missions and experts to countries requesting them, to advise governments on appropriate machinery for their planning services and the preparation and implementation of their overall development plans. Since 1960, planning missions have been sent to some 35 countries and technical assistance in the form of expert services has been provided

for about 60 countries. These activities will probably be increased in the future. Thirdly, Unesco assists in training national planning staff. To supervise this field of assistance, Unesco, with help from the World Bank and the Ford Foundation established an International Institute for Educational Planning in Paris, which started work in early 1964 with the basic aim of helping nations accelerate their economic and social progress through improved educational planning.

4. EDUCATION OUTSIDE SCHOOL

The work in this group of activities is divided into three sections: fundamental education, education of adults, and the development of youth activities.

Fundamental Education (Community Development). The main effort is directed towards those people who have not had the opportunity to go to school. Fundamental education aims at imparting the minimum knowledge and skills that people need to help themselves to improve their standard of living and to take a productive part in the social and economic life of their community. The basic need is to combat ignorance, which extends over half the world's population and is instrumental in breeding disease, poverty and lethargy.

Two regional fundamental education centres have been set up: one for Latin American States at Patzcuaro, Mexico, established in 1951, the other for Arab States at Sirs-el-Layyan, Egypt, established in 1955. Unesco has helped in setting up national expert training centres in a number of countries and also co-operates in many fundamental and adult education projects undertaken by Member States in Asia, Africa, Latin America and the Arab States.

Adult Education. The aim is to foster education, not only at school but throughout life. Unesco assists Member States and appropriate international organisations in the development of adult education activities by: co-operating to set up national and regional seminars; sending field missions to make surveys and advise on projects; publishing reports on projects and activities.

During 1964, Unesco sponsored two regional conferences on the planning and organisation of literacy programmes in Africa and in the Arab States, where the vital importance was stressed of all forms of out-of-school education in a rapidly changing world. During 1964, also, plans for an experimental programme in mass literacy, which would prepare the way for a World Campaign for Universal Literacy, were recommended by a committee of experts on literacy set up to advise Unesco's Director General, who had been charged by the UN General Assembly to explore the possibility of such a world campaign. Among recommendations was one that three-year pilot projects in up to eight selected countries should be undertaken by Unesco as part of the first of three consecutive phases in a long-term programme to achieve universal literacy. In this connection, Unesco missions, during 1965, visited 12 countries to help in the preparation of literacy projects and in the compilation of requests for aid for such projects. In September 1965, in response to an invitation by the Shah of Iran, Unesco convened a world congress at Teheran on the eradication of illiteracy.

Youth Work. The work is concentrated on assisting Member States and appropriate international organisations and institutions in the development of youth education for social responsibility and international understanding and co-operation. The Section supplies information and brings groups interested in the same problems into contact with each other. It also sponsors international voluntary work camps and an annual conference of work camp organisers. During 1964, Unesco organised an international youth conference at Grenoble, France, attended by delegates from 73 Member States and the first inter-governmental conference ever held on youth problems. As a result of this meeting, an International Committee on Youth was set up in 1965. With Unesco collaboration it will seek to promote youth activities for international co-operation and understanding.

5. AID TO SCIENTIFIC RESEARCH IN THE NATURAL SCIENCES AND THEIR APPLICATION TO DEVELOPMENT

These activities cover the following fields: basic sciences, earth sciences (astronomy and general geophysics, hydrology, oceanography, physics of the earth's crust, geological sciences, soil sciences, ecological studies and conservation of natural resources); life sciences (brain research, cell and molecular biology, microbiology, participation in basic research on cancer).

The exchange of ideas and results is encouraged by congresses and documentation, and the award of grants for study tours and missions. More concrete action was provided in the specific subjects mentioned above. Three main methods have been devised to produce the desired results. The first is to establish for each subject a new intergovernmental body, whether regional or international, which conducts its scientific work on its own initiative. The European Organisation for Nuclear Research and the International Computation Centre are examples of bodies of this kind. The second is to set up, within Unesco itself, an administrative co-ordinating body which possesses certain financial resources and acts on the scientific advice of a group of experts selected for that purpose: an example is provided by the new Inter-Governmental Oceanographic Commission set up in 1961, with a permanent staff within the Secretariat to service it. The third is to provide assistance for the establishment and operation of a non-governmental body responsible for achieving the co-operation desired, e.g. the International Brain Research Organisation set up in 1960.

Advisory Committees of experts of world-wide repute have been set up to help plan activities in the marine sciences and in natural resources. Among the recent or new initiatives undertaken by Unesco, or those to which the Organisation provides its active support, include the International Years of the Quiet Sun, the World Magnetic Survey (a continuing project of the International Geophysical Year), the International Hydrological Decade, as well as the International Indian Ocean Expedition, the International Co-operative Investigations of the Tropical Atlantic, and the Co-operative Study of the Kuroshio. Furthermore, in the field of seismology, Unesco has set up a system of emergency missions to send experts to the affected areas immediately after earthquakes have occurred.

General advice has also been given by short-term missions on the establishment of national scientific research centres.

The most important activity has been the creation *in toto* of institutions and services previously almost non-existent. It has been possible in this way to strengthen geophysical and seismological observatories, and geological and hydro-geological services.

The application of science and technology according to the needs of developing countries now takes a large place among the scientific activities of Unesco; technical and economic evaluation of these needs and direct aid provided to Member States are the basic features of this programme.

6. APPLIED SOCIAL SCIENCES

The Social Science programme makes a clear distinction between the promotion of pure research and learning in the field of the social sciences and the use of the social

sciences for solving social problems. The promotion of original research has also taken place into the attitudes of the people of one country towards people of other countries and into the roots of tension in local communities within different societies. On the other hand, a broad study of principal research trends throughout the world in the social and human sciences is in progress under Unesco's direction.

An inter-disciplinary programme has been constituted on the three great problems of our time: respect for human rights and the struggle against racial prejudice, the economic and social problems of newly-independent countries, the economic and social consequences of disarmament.

The analysis of the role of education, science, technology and information in economic development, pursued methodically, will continue to furnish the data necessary for the operational activities of Unesco and other international organisations, as well as the programme of statistical analysis and human resources assessment.

7. PRESERVATION OF THE CULTURAL HERITAGE OF MANKIND

Activity in this section is directed to the conservation and protection of the world's inheritance of books, works of art and monuments of history and science. Encouragement is also given to the exchange of publications,objects of artistic and scientific interest and other materials of information.

The protection of cultural property, historic monuments and of museum objects, archives, libraries, etc. during war is sought through the International Convention for the Protection of Cultural Property in the Event of Armed Conflict, signed at The Hague in 1954. Fifty-three Member States are parties to this Convention.

An International Centre for the Study of the Preservation and Restoration of Cultural Property has been established in Rome. A manual on the protection of cultural property has been published which deals with techniques for preservation and conservation. Since 1955, missions have advised on the preservation of culture in Peru, Yugoslavia, the Lebanon, Syria, Iraq, Israel, Egypt, Jordan, Iran, Pakistan, Afghanistan, Ecuador, the Sudan, Mexico, Nepal and India. International Seminars on Arts and Education have also been held since 1950 and two International Societies have been launched—one for Education through Art and the other for Music Education.

The International Campaign to save the Monuments of Egyptian and Sudanese Nubia launched in February, 1960, by Unesco, achieved almost total success in demonstrating the world's cultural solidarity. At the present time, the archaeological survey in the areas that will be inundated after the construction of the new Aswan dam is largely completed, while the dismantling of the threatened temples and monuments is being completed. The operation for safeguarding the temples of Abu-Simbel has begun.

8. MUTUAL APPRECIATION OF CULTURAL VALUES

The aim is to encourage a better mutual knowledge of the cultures of different peoples. In this way it is hoped to lay the foundations of real international understanding necessary for maximum peaceful co-operation among peoples.

The ninth session of Unesco's General Conference (New Delhi, 1956) established a ten-year major project aimed at developing the "Mutual Appreciation of Eastern and Western Cultural Values". The scheme aims to break down the barriers to the flow of information and ideas between the orient and occident. It has stimulated a very large number of cultural activities of an exchange nature throughout the world.

Unesco appointed a Commission in 1951 to prepare the publication of a history of the scientific and cultural development of mankind. The first two volumes, dealing with pre- and proto-history, have been published in London and New York. A quarterly *Journal of World History* is published by the Commission.

The department sponsors international circulation of masterpieces of the visual arts and of music. Exhibitions of reproductions representing the great periods of both Western and Eastern art are circulating in Member States.

The Unesco *World Art Series* albums, devoted to works of art not sufficiently known outside their countries of origin, are published in five languages. Catalogues listing high quality reproductions of paintings of all periods have been published for the guidance of students, teachers and the general public.

Under the auspices of the International Music Council a collection has been made of recordings of traditional and contemporary music of all continents.

Great works representative of the genius of different people are translated and published. Translations of works from twenty-six different literatures have so far been made, chiefly into English and French.

9. FREE FLOW OF INFORMATION

Among the principal methods used are: sponsorship of international agreements; proposals to reduce telecommunication, postal, transport and tariff obstacles to the flow of information; administration of coupon schemes designed to overcome currency barriers; action to improve the techniques and expand the means of communication; the publication of reports and studies focusing public attention on obstacles to the free flow of information.

The underlying reason for Unesco's action in this field is that the dearth of communication facilities in large areas of the world, a maze of non-political restrictions and the high cost of sending information from country to country constitute formidable obstacles to the creation of an enlightened public opinion. In short, it appears that nearly 70 per cent of the world's peoples lack the means of being adequately informed of developments at home, let alone in other countries. "Adequate" facilities, according to a Unesco minimum standard accepted by the UN, consist of at least ten copies of a daily newspaper, five radio receivers and two cinema seats for every 100 persons. More than 100 countries and territories are below this minimum. Thus, for millions of people freedom of information, guaranteed by the universal Declaration of Human Rights, is far from being a reality.

Here are some of the results achieved:

1. Two international Agreements have been sponsored by Unesco: the Agreement on the Importation of Educational, Scientific and Cultural Materials and the Agreement for Facilitating the International Circulation of Visual and Auditory Materials of an Educational, Scientific and Cultural Character.

2. Proposals have been submitted to international conferences in the telecommunication, postal, transport and trade fields. Substantial concessions have been made in the rates and facilities offered.

3. Studies have been published such as *World Communications*, *Books for All*, *Trade Barriers to Knowledge*, *Transmitting World News* and *Mass Media and National Development*, which have spurred national efforts to reduce obstacles to the flow of information.

4. Member States have taken steps to facilitate the movement of persons engaged in educational, scientific and cultural activities.

5. Unesco's Coupon Schemes have helped to remove currency conversion obstacles, enabling individuals or organisations to purchase foreign books, films and other information materials and to pay for educational travel abroad.

In addition, Unesco has studied the means of ensuring that technological advances in communication should be applied to promote the free flow of information on the basis of a study of the use of space communication. An international meeting of experts was convened at the end of 1965 to study problems involved in the use of space communication by the mass media in order to promote the flow of information, the spread of education and greater cultural exchange. This meeting, held in close co-operation with the International Telecommunications Union (ITU) examined the special features of space radio and TV transmissions capable of reaching vast audiences, and helped guide Unesco in the preparation of its long-term programme in this field. Not only telecommunication techniques, but the types of programmes, the sharing of programmes and exchange arrangements for broadcasting to vast new audiences, were also dealt with.

Unesco has also provided limited direct aid and planned and conducted a series of seminars and experimental activities designed to improve the professional competence of those working in the mass media. Under the UN Expanded Programme for Technical Assistance, Unesco has for several years sent out aid missions to help in the setting up, improvement and expansion of local news agencies, newspapers, as well as radio, film and TV services. In 1964, a mission assisted Uganda in the creation of a national film unit. Another helped launch a six-year pilot project in Senegal for the integrated use of audio-visual aids, chiefly TV, in adult education. Increased aid was given to this project during 1965.

A long-term programme has been drawn up on the basis of regional meetings for Africa, the Arab States, Asia and Latin America to develop the press, radio, films and television in the developing countries. This programme was endorsed by the General Assembly of the UN as a part of the UN Development Decade. Unesco has also organised meetings of television and radio producers and regional training courses in broadcasting techniques. Fellowships in these fields have also been awarded. The first meeting on the introduction and development of television in Africa was held in 1964. The purpose of this meeting was to examine the organisational and financial problems of TV in African countries; indicate the potential contribution of the medium to the social, educational and cultural development of African countries; and pave the way for the systematic development of TV based on the needs and conditions of the countries of Africa. Unesco has also sought to promote the establishment of regional centres for the training of teachers of journalism. The first such centre began operating in 1951 at Strasbourg University, and a second centre was opened in Ecuador in 1960. Others are planned for Asia and Africa. During 1965, mass communication study units were set up in conjunction with the universities of Dakar and Manila.

Tariff, postal and transport revenues waived each year as a result of action taken by Unesco are already at least equal in amount to the Organisation's total annual budget. Member States have also simplified administrative procedures affecting the international circulation of educational materials. More than $70 million has been made available by Unesco's Coupon Scheme, for the importation of books, films and scientific equipment, since the Scheme was launched in 1949.

10. "STUDY ABROAD"—THE INTERNATIONAL TRAINING OF SPECIALISTS

The programme has been carried out through three main lines of activity:

1. A programme of documentation to reveal the extent and nature of activities of governments and other agencies in the field.

2. A programme to improve the planning and administration of international training programmes.

3. A programme of training specialists in Unesco fields of interest, through awards of fellowships for study abroad, and the organisation of special courses and other measures.

Statistical documentation on foreign students in institutions of higher learning provided by Unesco has given governments and other agencies more complete information than has ever before been available on the scale of international training and study opportunities. New approaches to the appraisal of needs for international training have been developed. Work has also advanced on developing an evaluative approach to the actual administration of programmes, so that planners and administrators may develop certain simple techniques by which to judge the effectiveness of their planning and administration, and the ultimate results of their work. Since 1948 some 10,000 fellowships have been awarded in various fields for periods of study abroad. These fellowships have enabled persons, who are already specialists in their field, to obtain additional general or technical training abroad for periods of four to nine months—longer in exceptional cases. Fellowships have played an important role in training local "counterparts" to take over responsibilities from experts sent abroad for limited periods.

In some countries field experts have organised training centres and courses as a means of passing on their specialsed knowledge to nationals of the countries concerned.

Continuing efforts are made by Unesco to keep in touch with former fellows and there is much evidence to show that many former fellows are making valuable contributions, through the introduction of new techniques and knowledge, to the projects for which they have been trained.

Since 1948 Unesco has published a yearly handbook *Study Abroad* which currently lists over 170,000 individual opportunities for subsidised travel and study in other countries. In addition, from 1965 Unesco began publication of the *Unesco Handbook of International Exchanges* with information on national and international agencies operating exchange programmes in the fields of education, science and culture.

11. HUMAN RIGHTS

The universal rights (United Nations Declaration of Human Rights, 1948) of all individuals to education, an enjoyment of the arts and to a share in scientific advancement and its benefits, come directly within Unesco's competence. In addition to efforts already outlined, Unesco has, in this field, secured the Universal Copyright Convention (signed by 40 States, Geneva, 1952), and at the present time 50 States are parties to this instrument which came into force on September 16th, 1955. A series of reports has been prepared on the subject of education for women, and studies have been made of the role of educated women in Africa and Asia. The General Conference, at its eleventh session (Paris, 1960), adopted a Convention and Recommendation against discrimination in education, which came into force on May 22nd, 1962. The total number of states party to it is 30.

OTHER PROGRAMMES

1. EXPANDED PROGRAMME OF TECHNICAL ASSISTANCE

Unesco, like the other major specialised agencies, has been a participant since 1954 in the United Nations Expanded Programme of Technical Assistance for economic development, under which experts are sent to requesting countries, fellowships granted and other facilities provided to assist these countries in framing and implementing measures of economic development. In 1965 and 1966 Unesco's share (about 16 per cent) of the total funds amounts to $16,550,000, which paid for over 650 experts (mostly in education or science) in some 60 countries and territories, 670 fellowships to nationals of assisted countries, and a small amount of demonstration equipment and supplies. There are also some regional projects covering a group of countries, several of them operated in collaboration with the United Nations or other agencies.

2. PARTICIPATION PROGRAMME

The United Nations Expanded Programme can only finance projects clearly aimed at economic development, and this definition excludes certain Unesco objectives, e.g. in the fields of the social sciences, cultural activities, etc., in regard to which Member States have sought the organisation's direct assistance. Accordingly there was launched in 1956 a "Participation" programme under which a fraction of Unesco's total budget is set aside for direct assistance given on request to Member States. Some $1,800,000 became available in 1965 and 1966 for this purpose, and this has been allocated to meet requests originating from 75 countries and territories. Apart from aid in the educational and scientific fields the subjects covered include social science teaching, the preservation and restoration of monuments, the development of libraries and museums, the development of communication facilities, public administration, arts and crafts, etc.

3. UNITED NATIONS SPECIAL FUND

As a complement to the Expanded Programme of Technical Assistance (which is mainly concerned with the provision of expert advice) the General Assembly of the United Nations set up in October 1958 a voluntary "Special Fund" designed to finance major undertakings calculated to promote economic development in under-developed countries. Here again Unesco is a participating agency and has now been given responsibility for 79 projects in all parts of the world, for a total cost of $90,000,000 spread over five years. The fields covered are teacher-training (secondary, technical and vocational), training of technicians and applied scientific research. Teacher-training at the secondary level is largely concentrated in Africa, where the need is greatest, and the tendency of the Special Fund authorities is towards increased liberality in this field. In addition, it has been proposed that criteria for Special Fund programmes be further extended to include women's education and assistance to the training of primary school teachers in countries where the shortcomings of primary education constitute a serious handicap to economic development.

4. OTHER INTERNATIONAL ACCOUNTS

Main items include:

The International Campaign for safeguarding the monuments of Nubia, to which many Member States and private institutions have contributed by providing funds and by sending archæological missions to the United Arab Republic and Republic of Sudan.

The Emergency Programme for Educational Development in Africa, launched by the General Conference at its eleventh session. Funds volunteered to this programme by Member States have allowed for the creation of:

A Unesco School Construction Bureau for Africa in Khartoum in co-operation with the Government of Sudan.

A Textbook Production Centre in Yaoundé in co-operation with the Government of Cameroun.

Overseas teachers and professors and aid in educational planning, in the form of expert missions, to numerous African Member States.

In addition, Unesco continues to co-operate with an international aid programme launched in 1960 by the International Bank for Reconstruction and Development (IBRD) under the name of the International Development Association (IDA). Whereas the UN Special Fund (*see above*) is concerned with "pre-investment" projects (although of considerable magnitude) the IDA concentrates its resources on larger scale projects of an operational nature. The General Conference at its eleventh session authorised the Director-General to collaborate with the Association "by advising Member States on projects which might suitably be presented to IDA for loans, by advising IDA on projects within the sphere of Unesco's competence for which loans are being considered" and "by assisting Member States in the preparation and presentation of requests to IDA."

During the course of 1964–65, a $13 million credit was extended to Pakistan for development of education in both parts of the country, following a $5 million credit to Tunisia and a $4.6 million credit to Tanzania. Credits were also extended for the same purposes to Afghanistan ($3.6 million), to the Philippines ($9 million), and to Nigeria ($20 million).

The World Bank for Reconstruction and Development agreed in 1964 to extend its loans to the educational field, and missions were sent to Latin America and other regions during late 1964 and 1965 to assess possible projects for the spread of education in developing countries.

ORGANISATION

1. General Conference. Meets in ordinary session once in two years and is composed of representatives of the Member States. The thirteenth session was held in October/November 1964 at the permanent Headquarters in Paris.

2. Executive Board. Consists of 30 members elected for a 4-year term. Prepares the programme to be submitted to the Conference and supervises its execution. The seventieth session of the Board took place in Paris in May 1965.

3. Secretariat. The Director-General and an international staff of more than 500 professional civil servants drafted from 92 countries.

Co-operating Bodies. In addition to the structure of UNESCO, as outlined above, National Commissions or co-operating bodies have been set up in most of the Member States of UNESCO. These Commissions, which are intended to bring together within each country government officials and the principal non-governmental bodies interested in educational, scientific and cultural matters (*see below*, Constitution, Article VII), help to integrate the individual efforts in Member States with the work of the Organisation and to act in an advisory capacity to their governments in matters relating to the Organisation.

The number of Member States of UNESCO as at October 1st, 1965, was 119. The last country to join was Portugal.

MEMBERS OF THE EXECUTIVE BOARD 1965–1966

Chairman MOHAMMED EL FASI (Morocco); Vice-Chairmen: ATILIO DELL' ORO MAINI (Argentina), ATHANASE JOJA (Rumania), BEDRETTIN TUNCEL (Turkey), Dame MARY SMIETON (United Kingdom); Members: ZIADA ARBAB (Sudan), MOSHÉ AVIDOR (IsraelP, AMADOU HAMPÂTÉ BA (Mali), BERNARD BARBEY (Switzerland), WILLIAM BENTON (U.S.A.), JULIEN CAIN (France), PAULO E. CONSTITUTION

London, November 16th, 1945.

The Governments of the States parties to this Constitution on behalf of their peoples declare:

That since wars begin in the minds of men, it is in the minds of men that the defences of peace must be constructed;

That ignorance of each other's ways and lives has been a common cause, throughout the history of mankind, of that suspicion and mistrust between the peoples of the world through which their differences have all too often broken into war;

That the great and terrible war which has now ended was a war made possible by the denial of the democratic principles of the dignity, equality, and mutual respect of men, and by the propagation, in their place, through ignorance and prejudice, of the doctrine of the inequality of men and races;

That the wide diffusion of culture, and the education of humanity for justice and liberty and peace are indispensable to the dignity of man and constitute a sacred duty which all the nations must fulfil in a spirit of mutual assistance and concern;

That a peace based exclusively upon the political and economic arrangements of governments would not be a peace which could secure the unanimous, lasting, and sincere support of the peoples of the world, and that the peace must therefore be founded, if it is not to fail, upon the intellectual and moral solidarity of mankind.

For these reasons, the States parties to this Constitution, believing in full and equal opportunites for education for all, in the unrestricted pursuit of objective truth, and in the free exchange of ideas and knowledge, are agreed and determined to develop and to increase the means of communication between their peoples and to employ these means for the purposes of mutual understanding and a truer and more perfect knowledge of each other's lives.

In consequence whereof they do hereby create the United Nations Educational, Scientific, and Cultural Organisation for the purpose of advancing, through the educational and scientific and cultural relations of the peoples of the world, the objectives of international peace and of the common welfare of mankind for which the United Nations Organisation was established and which its Charter proclaims.

Article I

Purposes and Functions

1. The purpose of the Organisation is to contribute to peace and security by promoting collaboration among the nations through education, science, and culture in order to further universal respect for justice, for the rule of law, and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language, or religion, by the Charter of the United Nations.

2. To realise this purpose the Organisation will:

(*a*) Collaborate in the work of advancing the mutual knowledge and understanding of peoples, through all means of mass communication, and to that end recommend such international agreements as may be necessary to promote the free flow of ideas by word and image;

(*b*) Give fresh impulse to popular education and to the spread of culture:

by collaborating with Members, at their request, in the development of educational activities;

by instituting collaboration among the nations to advance the ideal of equality of educational opportunity without regard to race, sex, or any distinctions, economic or social;

by suggesting educational methods best suited to prepare the children of the world for the responsibilities of freedom;

(*c*) Maintain, increase, and diffuse knowledge:

by assuring the conservation and protection of the world's inheritance of books, works of art, and monuments of history and science, and recommending to the nations concerned the necessary international conventions;

by encouraging co-operation among the nations in all branches of intellectual activity, including the international exchange of persons active in the fields of education, science, and culture and the exchange of publications, objects of artistic and scientific interest, and other materials of information;

by initiating methods of international co-operation calculated to give the people of all countries access to the printed and published materials produced by any of them.

3. With a view to preserving the independence, integrity, and fruitful diversity of the cultures and educational systems of the States Members of this Organisation, the Organisation is prohibited from intervening in matters which are essentially within their domestic jurisdiction.

Article II

Membership

1. Membership of the United Nations Organisation shall carry with it the right to membership of the United Nations Educational, Scientific, and Cultural Organisation.

2. Subject to the conditions of the agreement between this Organisation and the United Nations Organisation, approved pursuant to Article X of this Constitution, States not members of the United Nations Organisation may be admitted to membership of the Organisation, upon recommendation of the Executive Board, by a two-thirds majority vote of the General Conference.

3. Territories or groups of territories which are not responsible for the conduct of their international relations may be admitted as Associate Members by the General Conference by a two-thirds majority of Members present and voting, upon application made on behalf of such territory or group of territories by the Member or other authority having responsibility for their international relations. The nature and extent of the rights and obligations of Associate Members shall be determined by the General Conference.

4. Members of the Organisation which are suspended from the exercise of the rights and privileges of membership of the United Nations Organisation, shall, upon the request of the latter, be suspended from the rights and privileges of this Organisation.

5. Members of the Organisation which are expelled from the United Nations Organisation shall automatically cease to be members of this Organisation.

6. Any Member State or Associate Member of the Organisation may withdraw from the Organisation by notice addressed to the Director-General. Such notice shall take effect on December 31st of the year following that during which the notice was given. No such withdrawal shall affect the financial obligations owed to the Organisation on the date the withdrawal takes effect. Notice of withdrawal by an Associate Member shall be given on its behalf by the Member State or other authority having responsibility for its international relations.

Article III

Organs

The Organisation shall include a General Conference, an Executive Board, and a Secretariat.

Article IV

The General Conference

(*a*) *Composition*

1. The General Conference shall consist of the representatives of the States Members of the Organisation. The Government of each Member State shall appoint not more than five delegates, who shall be selected after consultation with the National Commission, if established, or with educational, scientific, and cultural bodies.

(*b*) *Functions*

2. The General Conference shall determine the policies and the main lines of work of the Organisation. It shall take decisions on programmes drawn up by the Executive Board.

3. The General Conference shall, when it deems it desirable, summon international conferences on education, the sciences, and humanities, and the dissemination of knowledge; non-governmental conferences on the same subjects may be summoned by the General Conference or by the Executive Board in accordance with such regulations.

4. The General Conference shall, in adopting proposals for submission to the Member States, distinguish between recommendations and international conventions submitted for their approval. In the former case a majority vote shall suffice; in the latter case a two-thirds majority shall be required. Each of the Member States shall submit recommendations or conventions to its competent authorities within a period of one year from the close of the session of the General Conference at which they were adopted.

5. Subject to the provisions of Article V, para. 5 (iii), the General Conference shall advise the United Nations Organisation on the educational, scientific, and cultural aspects of matters of concern to the latter, in accordance with the terms and procedure agreed upon between the appropriate authorities of the two Organisations.

6. The General Conference shall receive and consider the reports submitted periodically by Member States as provided by Article VIII.

7. The General Conference shall elect the members of the Executive Board, and, on the recommendation of the Board, shall appoint the Director-General.

(*c*) *Voting*

8. (i) Each Member State shall have one vote in the General Conference. Decisions shall be made by a simple majority except in cases in which a two-thirds majority is required by the provisions of this Constitution or of the Rules of Procedure of the General Conference. A majority shall be a majority of the Members present and voting.

(ii) A Member State shall have no vote in the General Conference if the total amount of contributions due from it exceeds the total amount of contributions payable by it for the current year and the immediately preceding calendar year.

(iii) The General Conference may nevertheless permit such a Member State to vote, if it is satisfied that the failure to pay is due to conditions beyond the control of the Member Nation.

(*d*) *Procedure*

9. (i) The General Conference shall meet in ordinary session every two years. It may meet in extraordinary session if it decides to do so itself or if summoned by the Executive Board, or on the demand of at least one-third of the Member States.

(ii) At each session the location of its next ordinary session shall be designated by the General Conference. The location of an extraordinary session shall be decided by the General Conference if the session is summoned by it, or otherwise by the Executive Board.

10. The General Conference shall adopt its own rules of procedure. It shall at each session elect a President and other officers.

11. The General Conference shall set up special and technical committees and such other subordinate bodies as may be necessary for its purposes.

12. The General Conference shall cause arrangements to be made for public access to meetings, subject to such regulations as it shall prescribe.

(*e*) *Observers*

13. The General Conference, on the recommendation of the Executive Board and by a two-thirds majority, may, subject to its rules of procedure, invite as observers at specified sessions of the Conference or of its commissions representatives of international organisations, such as those referred to in Article XI, paragraph 4.

14. When consultative arrangements have been approved by the Executive Board for such international non-governmental or semi-governmental organisations in the manner provided in Article XI, paragraph 4, those organisations shall be invited to send observers to sessions of the General Conference and its Commissions.

Article V

Executive Board

(*a*) *Composition*

1. The Executive Board shall be elected by the General Conference from among the delegates appointed by the Member States and shall consist of twenty-two members, each of whom shall represent the Government of the State of which he is a national. The President of the General Conference shall sit *ex officio* in an advisory capacity on the Executive Board.

2. In electing the members of the Executive Board the General Conference shall endeavour to include persons competent in the arts, the humanities, the sciences, education, and the diffusion of ideas, and qualified by their experience and capacity to fulfil the administrative and executive duties of the Board. It shall also have regard to the diversity of cultures and a balanced geographical distribution. Not more than one national of any Member State shall serve on the Board at any one time, the President of the Conference excepted.

3. Members of the Board shall serve from the close of the session of the General Conference which elected them until the close of the second ordinary session of the General Conference following that election. They shall be immediately eligible for a second term, but shall not serve consecutively for more than two terms. Half of the members of the Board shall be elected every two years.

4. In the event of the death or resignation of a member of the Executive Board, his replacement for the remainder of his term shall be appointed by the Executive Board on the nomination of the Government of the State the former represented. The Government making the nomination and the Executive Board shall have regard to the factors set forth in paragraph 2 of this Article.

(*b*) *Functions*

5 (i) The Executive Board shall prepare the Agenda for the General Conference. It shall examine the programme of work for the Organisation and corresponding Budget Estimates submitted to it by the Director-General in accordance with paragraph 3 of Article VI and shall submit them with such recommendations as it considers desirable to the General Conference.

(ii) The Executive Board, acting under the authority of the General Conference, shall be responsible for the execu-

tion of the programme adopted by the Conference. In accordance with the decisions of the General Conference and having regard to circumstances arising between two ordinary sessions, the Executive Board shall take all necessary measures to ensure the effective and rational execution of the programme by the Director-General.

(iii) Between ordinary sessions of the General Conference, the Board may discharge the functions of adviser to the United Nations, set forth in Article IV, paragraph 5, whenever the problem upon which advice is sought has already been dealt with in principle by the Conference, or when the solution is implicit in decisions of the Conference.

6. The Executive Board shall recommend to the General Conference the admission of new Members to the Organisation.

7. Subject to decisions of the General Conference, the Executive Board shall adopt its own rules of procedure. It shall elect its officers from among its members.

8. The Executive Board shall meet in regular session at least twice a year and may meet in special session if convoked by the Chairman on his own initiative or upon the request of six members of the Board.

9. The Chairman of the Executive Board shall present, on behalf of the Board, to each ordinary session of the General Conference, with or without comments, the reports on the activities of the Organisation which the Director-General is required to prepare in accordance with the provisions of Article VI, 3*b*.

10. The Executive Board shall make all necessary arrangements to consult the representatives of international organisations or qualified persons concerned with questions within its competence.

11. Between sessions of the General Conference, the Executive Board may request advisory opinions from the International Court of Justice on legal questions arising within the field of the Organisation's activities.

12. Although the members of the Executive Board are representative of their respective Governments they shall exercise the powers delegated to them by the General Conference on behalf of the Conference as a whole.

The term of office of the members of the Executive Board during the eighth session of the General Conference shall end at the close of the eighth session of the General Conference. At the eighth session of the General Conference, twenty-two members shall be elected to the Executive Board pursuant to the provisions of this Article, of whom one-half shall retire at the close of the ninth session of the General Conference, the retiring members being chosen by the drawing of lots. Thereafter, eleven members shall be elected at each ordinary session of the General Conference.

Article VI

Secretariat

1. The Secretariat shall consist of a Director-General and such staff as may be required.

2. The Director-General shall be nominated by the Executive Board and appointed by the General Conference for a period of six years, under such conditions as the Conference may approve, and shall be eligible for re-appointment. He shall be the chief administrative officer of the Organisation.

3. (*a*) The Director-General, or a deputy designated by him, shall participate, without the right to vote, in all meetings of the General Conference, of the Executive Board, and of the Committees of the Organisation. He shall formulate proposals for appropriate action by the Conference and the Board, and shall prepare for submission to the Board a draft programme of work for the Organisation with corresponding budget estimates.

(*b*) The Director-General shall prepare and communicate to Member States and to the Executive Board periodical reports on the activities of the Organisation. The General Conference shall determine the periods to be covered by these reports.

4. The Director-General shall appoint the staff of the Secretariat in accordance with staff regulations to be approved by the General Conference. Subject to the paramount consideration of securing the highest standards of integrity, efficiency, and technical competence, appointment to the staff shall be on as wide a geographical basis as possible.

5. The responsibilities of the Director-General and of the staff shall be exclusively international in character. In the discharge of their duties they shall not seek or receive instructions from any Government or from any authority external to the Organisation. They shall refrain from any action which might prejudice their position as international officials. Each State Member of the Organisation undertakes to respect the international character of the responsibilities of the Director-General and the staff, and not to seek to influence them in the discharge of their duties.

6. Nothing in this Article shall preclude the Organisation from entering into special arrangements within the United Nations Organisation for common services and staff and for the interchange of personnel.

Article VII

National Co-operating Bodies

1. Each Member State shall make such arrangements as suit its particular conditions for the purpose of associating its principal bodies interested in educational, scientific, and cultural matters with the work of the Organisation, preferably by the formation of a National Commission broadly representative of the Government and such bodies.

2. National Commissions or national co-operating bodies, where they exist, shall act in an advisory capacity to their respective delegations to the General Conference and to their Governments in matters relating to the Organisation, and shall function as agencies of liaison in all matters of interest to it.

3. The Organisation may, on the request of a Member State, delegate, either temporarily or permanently, a member of its Secretariat to serve on the National Commission of that State, in order to assist in the development of its work.

Article VIII

Reports by Member States

Each Member State shall report periodically to the Organisation, in a manner to be determined by the General Conference, on its laws, regulations, and statistics relating to educational, scientific, and cultural life and institutions, and on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.

Article IX

Budget

1. The budget shall be administered by the Organisation.

2. The General Conference shall approve and give final effect to the budget and to the apportionment of financial responsibility among the States Members of the Organisation subject to such arrangement with the United Nations as may be provided in the agreement to be entered into pursuant to Article X.

3. The Director-General, with the approval of the Executive Board, may receive gifts, bequests, and subventions directly from Governments, public and private institutions, associations, and private persons.

Article X

Relations with the United Nations Organisation

This Organisation shall be brought into relation with the United Nations Organisation, as soon as practicable, as one of the specialised agencies referred to in Article 57 of the Charter of the United Nations. This relationship shall be effected through an agreement with the United Nations Organisation under Article 63 of the Charter, which agreement shall be subject to the approval of the General Conference of this Organisation. The agreement shall provide for effective co-operation between the two Organisations in the pursuit of their common purposes, and at the same time shall recognise the autonomy of this Organisasion within the fields of its competence as defined in this Constitution. Such agreement may, among other matters, provide for the approval and financing of the budget of the Organisation by the General Assembly of the United Nations.

Article XI

Relations with other Specialised International Organisations and Agencies

1. This Organisation may co-operate with other specialised inter-governmental organisations and agencies whose interests and activities are related to its purposes. To this end the Director-General, acting under the general authority of the Executive Board, may establish effective working relationships with such organisations and agencies and establish such joint committees as may be necessary to assure effective co-operation. Any formal arrangements entered into with such organisations or agencies shall be subject to the approval of the Executive Board.

2. Whenever the General Conference of this Organisation and the competent authorities of any other specialised inter-governmental organisations or agencies whose purposes and functions lie within the competence of this Organisation deem it desirable to effect a transfer of their resources and activities to this Organisation, the Director-General, subject to the approval of the Conference, may enter into mutually acceptable arrangements for this purpose.

3. This Organisation may make appropriate arrangements with other inter-governmental organisations for reciprocal representation at meetings.

4. The United Nations Educational, Scientific, and Cultural Organisation may make suitable arrangements for consultation and co-operation with non-governmental international organisations concerned with matters within its competence, and may invite them to undertake specific tasks. Such co-operation may also include appropriate participation by representatives of such organisations on advisory committees set up by the General Conference.

Article XII

Legal Status of the Organisation

The provisions of Articles 104 and 105 of the Charter of the United Nations Organisation concerning the legal status of that Organisation, its privileges, and immunities, shall apply in the same way to this Organisation.

Article XIII

Amendments

1. Proposals for amendments to this Constitution shall become effective upon receiving the approval of the General Conference by a two-thirds majority; provided, however, that those amendments which involve fundamental alterations in the aims of the Organisation or new obligations for the Member States shall require subsequent acceptance on the part of two-thirds of the Member States before they come into force. The draft texts of proposed amendments shall be communicated by the Director-General to the Member States at least six months in advance of their consideration by the General Conference.

2. The General Conference shall have power to adopt, by a two-thirds majority, rules of procedure for carrying out the provisions of this Article.

Article XIV

Interpretation

1. The English and French texts of this Constitution shall be regarded as equally authoritative.

2. Any question or dispute concerning the interpretation of this Constitution shall be referred for determination to the International Court of Justice or to an arbitral tribunal, as the General Conference may determine under its rules of procedure.

Article XV

Entry into Force

1. This Constitution shall be subject to acceptance. The instruments of acceptance shall be deposited with the Government of the United Kingdom.

2. This Constitution shall remain open for signature in the archives of the Government of the United Kingdom. Signature may take place either before or after the deposit of the instrument of acceptance. No acceptance shall be valid unless preceded or followed by signature.

3. This Constitution shall come into force when it has been accepted by twenty of its signatories. Subsequent acceptances shall take effect immediately.

4. The Government of the United Kingdom will inform all members of the United Nations of the receipt of all instruments of acceptance and of the date on which the Constitution comes into force in accordance with the preceding paragraph.

In faith whereof, the undersigned, duly authorised to that effect, have signed this Constitution in the English and French languages, both texts being equally authentic.

Done in London the sixteenth day of November, 1945, in a single copy, in the English and French languages, of which certified copies will be communicated by the Government of the United Kingdom to the Governments of all the Members of the United Nations.

INTERNATIONAL COUNCIL OF SCIENTIFIC UNIONS

International Council of Scientific Unions (*Conseil international des unions scientifiques*), 2 via Sebenico, Rome, Italy.

The ICSU was founded in 1931, succeeeding the International Research Council founded in 1919 to co-ordinate international efforts in the different branches of science and its applications; to initiate the formation of international associations or unions deemed to be useful to the progress of science; to enter into relations with the governments of the countries adhering to the Council in order to promote investigations falling within the competence of the Council. Adhering organisations represent 57 countries and 14 international unions. In December 1946 an agreement was signed between UNESCO and the ICSU recognising the latter as the co-ordinating and representative body of international scientific unions.

UNIONS FEDERATED TO THE ICSU

International Astronomical Union (*Union astronomique internationale*), Observatoire de Nice, Le Mont-Gros, Nice (Alpes-Maritimes), France; f. 1919. Object: To facilitate co-operation between the astronomers of various countries and to further the study of astronomy in all its branches; 43 countries are affiliated, there are approx. 1,500 individual members. Its next General Assembly will be held in 1967 in Prague.

Pres. Prof. P. SWINGS (Institut d'Astrophysique, Cointe-Sclessin, Liège, Belgium); Gen.-Sec. J.-C. PECKER (Observatoire de Nice). Publs. *Transactions of the International Astronomical Union* and *Symposia organised by the International Astronomical Union.*

International Geographical Union (IGU) (*Union géographique internationale*); f. 1923. Objects: To encourage the study of problems relating to geography, to promote and co-ordinate research requiring international co-operation, and to organise international congresses and commissions; 51 mem. countries.

Pres. Prof. C. TROLL (Germany); Sec.-Treas. Prof. HANS BOESCH, Blüemlisalpstr. 10, 8006 Zürich, Switzerland.

International Mathematical Union, Tata Institute of Fundamental Research, Colaba, Bombay 5, India, Business office: Eidgenössische Technische Hochschule, Zürich, Switzerland; f. 1952 by a convention of delegates of national committees representing 22 countries which met in New York. Objects: To promote international co-operation in mathematics; to support and assist the International Congress of Mathematicians and other international scientific meetings or conferences; to encourage and support other international mathematical activities considered likely to contribute to the development of mathematical science—pure, applied, or educational; 42 mem. countries.

Exec. Cttee.: Pres. Prof. G. DE RHAM; Vice-Pres. H. CARTAN, K. KURATOWSKI; Sec. K. CHANDRASEKHARAN; mems. J. C. BURKILL, F. HIRZEBRUCH, M. A. LAVRENTIEV, D. MONTGOMERY, B. SEGRE, R. NEVANLINNA.

International Scientific Radio Union (*Union radio scientifique internationale*), 7 Place Emile Danco, Brussels 18; f. 1920 Objects: to develop scientific studies connected with radioelectricity, and especially (*a*) to promote and organise research necessitating international co-operation, and to facilitate the discussion and publication of the results of this research, and (*b*) to facilitate the establishment of common radio measurements and standards. There are 34 national committees.

Pres. Prof. I. KOGA (Japan); Sec.-Gen. E. HERBAYS (Brussels). Publs. *Proceedings of General Assemblies of the URSI, Information Bulletin* (bi-monthly), *Special Reports, Proceedings of Meetings of Mixed Commissions: (a) on the Ionosphere, (b) on Radio-Meteorology, Ionospheric Stations Manual.*

International Union of Biochemistry (*Union internationale de biochimie*), c/o Institut de Chimie Biologique, Faculté des Sciences, Place Victor-Hugo, Marseilles, France; f. 1955; Objects: (*a*) to encourage the continuance of a series of International Congresses of Biochemistry, (*b*) to promote international co-ordination of research, discussion and publication, (*c*) to organise a permanent co-operation between the societies representing biochemistry in the adherent countries, and (*d*) to contribute to the advancement of biochemistry in all its international aspects. Twenty-eight member countries. The last meeting of the Union took place in New York (July 1964).

Pres. Prof. S. OCHOA (U.S.A.); Treas. Prof. E. H. STOTZ (U.S.A.); Sec.-Gen. Prof. P. DESNUELLE (France),

International Union of Biological Sciences (*Union internationale des sciences biologiques*); f. 1919. Object: The promotion of international co-operation in biology. Thirty-four countries are represented.

Pres. Prof. C. H. WADDINGTON; Sec.-Gen. Prof. D. S. FARNER, Dept. of Zoology, University of Washington, Seattle, Washington, U.S.A.; Sec. Acad. I. MÁLEK (Czechoslovakia); Treas. Dr. F. A. STAFLEU (Netherlands).

International Union of Crystallography (*Union internationale de cristallographie*); f. 1947. Objects: To promote international co-operation in crystallography; to contribute to the advancement of crystallography in all its aspects, including related topics concerning the non-crystalline states; to facilitate international standardisation of methods, of units, of nomenclature and of symbols used in crystallography; and to form a focus for the relations of crystallography to other sciences; 28 member countries; 8 Commissions.

Pres. J. D. BERNAL (U.K.); Gen. Sec. Dr. D. W. SMITS (Rekencentrum der Rijksuniversiteit, Grote Appelstraat 11, Groningen, Netherlands). Publs. *Acta Crystallographica* (monthly), *Structure Reports* (about one volume per annum), *International Tables for X-ray Crystallography*, *Fifty Years of X-ray Diffraction*, *World Directory of Crystallographers*, etc.

International Union of Geodesy and Geophysics (*Union géodésique et géophysique internationale*), Geophysics Laboratory, University of Toronto, Toronto, Canada; f. 1919. Objects: To promote the study of problems relating to the form and physics of the earth; to initiate, facilitate and co-ordinate research into, and investigation of, those problems of geodesy and geophysics which require international co-operation; to provide for discussion, comparison and publication. The Union is a federation of 7 associations representing Geodesy, Seismology and Physics of the Earth's Interior, Physical Oceanography, Volcanology, Scientific Hydrology, Meteorology and Atmospheric Physics, Geomagnetism and Aeronomy, which meet at the General Assemblies of the Union. In addition, there are Joint Committees of the various associations either among themselves or with other unions. The Union organises scientific meetings and also sponsors various permanent services, the object of which is to collect, analyse and publish geophysical data; 61 mem. countries.

Pres. J. KAPLAN (U.S.A.); Vice-Pres. K. E. BULLEN (Australia), J. COULOMB (France); Gen. Sec. G. D. GARLAND (Canada); Publs. *IUGG Chronicle* (fortnightly), *IUGG Monographs* (irregular), *Proceedings of Assemblies*; in addition each member association has its own series of publications.

International Union of Geological Sciences (*Union International des sciences géologiques*); f. 1961 as an offspring of the International Geological Congress; mems. from 50 countries.

Pres. TOM F. W. BARTH (Norway); Vice-Pres. F. GONZALES BONORINO (Argentina), I. I. GORSKY (U.S.S.R.), TOM B. NOLAN (U.S.A.), B. C. ROY (India), R. W. WILLETT (New Zealand), V. ZOUBEK (Czechoslovakia); Tres. R. TRUMPY (Switzerland); Sec.-Gen. W. P. VAN LECKWIJCK, Mechelse steenweg 206, Antwerp, Belgium; Publ. *I.U.G.S. Circular Letters.*

International Union of the History and Philosophy of Science (*Union internationale d'histoire et de philosophie des sciences*), 12 rue Colbert, Paris 2e, France; Division of Logic, Methodology and Philosophy of Science, Stanford University, Stanford, California, U.S.A.; f. 1954. Object: To act as a clearing-house for research into the history and philosophy of science and to assist directly the activities of UNESCO in this field.

Council: Pres. Prof. V. RONCHI (Italy); Vice-Pres. Prof. G. H. VON WRIGHT (Finland); Treas. Dr. D. A. WITTOP-KONING (Netherlands); Sec.-Gen. Dr. R. TATON (France). Publs. *Archives internationales d'histoire des sciences*, *Journal of Symbolic Logic.*

International Union of Physiological Sciences, c/o Prof. W. O. FENN, Medical Center, University of Rochester, Rochester 20, N.Y., U.S.A.; f. 1953 to encourage the series of International Congresses of Physiological Sciences (Physiology and Pharmacology); to promote further congresses; to take all action which will contribute to the development of physiological sciences; mems. national or regional physiological societies of 37 countries.

Pres. Sir LINDOR BROWN (England); Vice-Pres. J. W. DUYFF (Neths); CARL F. SCHMIDT (U.S.A.); Sec. Prof. F. C. MACINTOSH (Canada).

International Union of Pure and Applied Chemistry—IUPAC (*Union internationale de chimie pure et appliquée*), Secretariat: c/o F. Hoffman-La Roche & Co. Ltd., Grenzacherstr. 124, 4002 Basle, Switzerland; f. 1919; Objects: to promote permanent co-operation between the chemists of the member countries; to study topics of international importance which require regulation, standardization or codification; to co-operate with other international organizations which deal with topics of a chemical nature; to contribute to the advancement of pure and applied chemistry in all its aspects; 44 member countries.

Pres. W. KLEMM (Germany); Sec.-Gen. Dr. R. MORF (Switzerland); Hon. Treas. Prof. J. C. BAILAR, Jr. (U.S.A.). Publs. *Pure and Applied Chemistry*, *Comptes Rendus*, *Information Bulletin.*

International Union of Pure and Applied Physics (*Union internationale de physique pure et appliquée*); f. 1922. Object: to promote and encourage international co-operation in physics. Thirty-four countries are affiliated.

Pres. L. NÉEL (France); Sec.-Gen. C. C. BUTLER (Imperial College, South Kensington, London S.W.7, England).

International Union of Theoretical and Applied Mechanics (*Union internationale de mécanique théorique et appliquée*). The Union was created by a decision of the International Committee for the Congresses of Applied Mechanics at its meeting in Paris during the Sixth Congress, in September 1946. It formally came into existence on April 1st, 1947. The object of the Union is to form a link between persons and organisations engaged in scientific work (theoretical or experimental) in mechanics or in related sciences; to organise international meetings for subjects falling within this field; and to engage in other activities meant to promote the development of mechanics as a science; 25 mem. countries.

From November 1st, 1960 to October 31st, 1964 the Bureau of the Union consists of G. TEMPLE, Oxford (Pres.), F. K. G. ODQUIST, Stockholm (Vice-Pres.), Prof. MAURICE ROY, 55 Boulevard Malesherbes, Paris 8e, France (Sec.), W. T. KOITER, Delft (Treas.), and four other members.

The Union is directed by its General Assembly, which is composed of representatives of the organisations adhering to the Union and of elected members.

Tasks which fall within the sphere of activities of two or more Unions have been undertaken by the following Special Committees set up by the ICSU:

Scientific Committee on Oceanic Research (SCOR): f. 1957 to further international scientific activity in all branches of oceanic research; as a first step in this programme SCOR is engaged with UNESCO on the International Indian Ocean Expedition, begun in 1962.

Secretariat: Dr. G. BÖHNECKE, Neuer Wall 34, 2 Hamburg 36, German Federal Republic.

Scientific Committee on Antarctic Research (SCAR): f. 1958 to continue the co-operative scientific exploration of Antarctica after the close of the International Geophysical Year (IGY). Mems. 12 countries.

Secretariat: Dr. G. de Q. ROBIN, Scott Polar Research Institute, Cambridge, England.

Committee on Space Research (COSPAR): f. 1958 to continue and foster, after the end of IGY, international co-operation in all sciences that make use of the new research tools of rockets and satellites.

Pres. Prof. MAURICE ROY, 55 Boulevard Malesherbes, Paris 8e, France; Vice-Pres. Academician BLAGONRAVOV (U.S.S.R.), Dr. R. W. PORTER (U.S.A.); Secretariat: M. J. GAZIN, Exec. Sec., 55 Boulevard Malesherbes, Paris 8e, France.

Publs. *COSPAR Information Bulletin, International Reference Atmosphere Tables, World List of Optical and Radio Tracking Stations.*

International Geophysical Committee (*Comité international de géophysique—CIG*), 6 Cornwall Terrace, London, N.W.1; f. 1959 to continue the work of the International Geophysical Year in the following fields: Meteorology, Nuclear Radiation, Aeronomy, Geomagnetism, Aurora and Airglow, Solar Activity, Ionosphere, Cosmic Rays, Oceanography, Glaciology, Seismology, Paleogeophysics; to ensure the fullest exploitation of IGY and IGC data; to maintain the efficient functioning of the IGY World Data Centres; to encourage the discussion and utilisation of IGY and IGC 1959 results, and the publication of IGY and IGC results and bibliographies.

Hon. Pres. Prof. S. CHAPMAN; Pres. Prof. W. BEYNON (U.K.); Vice-Pres. V. V. BELOUSSOV (U.S.S.R.), Dr. M. A. POMERANTZ (U.S.A.), Prof. G. RIGHINI (Italy); Sec. Dr. C. M. MINNIS, 6. Cornwall Terrace, London, N.W.1, England.

ICSU Abstracting Board: f. 1949; facilitates the prompt publication of abstracts in Physics, Chemistry, Biology and Astronomy co-operates with the Institute for Scientific Information of the Academy of Sciences of the U.S.S.R.

Secretariat: Mrs. J. POYEN, Gen. Sec. ICSU Abstracting Board, 17 rue Mirabeau, Paris 16e, France.

Federation of Astronomical and Geophysical Services (FAGS): f. 1956; federates the following Permanent Services: International Time Bureau, International Polar Motion Service, Permanent Service of Geomagnetic Indices, International Gravimetric Bureau, International Seismological Summary, Monthly Bulletin of the International Seismological Bureau, Quarterly Bulletin of Solar Activity, Permanent Service of Earth Tides, International Ursigram and World Day Service, Mean Sea-Level Service, Permanent Service on Crustal Thickness, Solar Particles and Radiation Monitoring Organisation.

Pres. Prof. P. TARDI (France); Vice-Pres. Ing. E. HERBAYS (Belgium); Sec.-Gen. Prof. G. D. GARLAND (Canada), Geophysics Laboratory, University of Toronto, Toronto 5, Ontario; Scientific Sec. Dr. A. F. MOORE, Int. Council of Scientific Unions, Rome, Italy.

Publs. *Quarterly Bulletin of Solar Activity, International Seismological Summary, Tables of Geomagnetic Indices, Bulletin Mensuel du Bureau Central International de Séismologie, Bulletin Horaire,* etc.

Special Committee for the International Biological Programme (SCIBP): f. 1963; to undertake biological research in connection with world population growth and demands on the natural environment.

Pres. JEAN G. BAER (Switzerland); Vice-Pres. STANLEY A. CAID (U.S.A.); G. MONTALENTI (Italy); K. PETRUSEWICZ (Poland); C. H. WADDINGTON (U.K.); Central Office: 7 Marylebone Road, London, N.W.1., England.

Special Committee for the International Years of the Quiet Sun (IQSY): f. 1962 to organise all aspects of a special international programme of geophysical observations during the period of minimum solar activity in 1964 and 1965. Over 70 countries have participated.

Sec.: Dr. C. M. MINNIS, 6 Cornwall Terrace, London, N.W.1, England. Publs. *IQSY Instruction Manuals, IQSY Notes, Annals of the IQSY.*

INTERNATIONAL COUNCIL FOR PHILOSOPHY AND HUMANISTIC STUDIES

International Council for Philosophy and Humanistic Studies, (ICPHS) (*Conseil international de la philosophie et des sciences humaines*); Headquarters: Palais des Académies, 1 rue Ducale, Brussels; Secretariat: Maison de l'UNESCO, 6 rue Franklin, Paris 16e, France; f. 1949 under the auspices of UNESCO to encourage respect for cultural autonomy by the comparative study of civilisation, to contribute towards international understanding through a better knowledge of man, to develop international co-operation in philosophy, humanistic and kindred studies, to encourage the setting up of international organisations, to promote the dissemination of information in these fields, to sponsor works of learning, etc. The Council is composed of 12 international non-governmental organisations listed below. These organisations represent 92 countries. In December 1951 an agreement was signed between UNESCO and ICPHS recognising the latter as the co-ordinating and representative body of organisations in the field of philosophy and humanistic studies.

Pres. Charles E. Odegaard (U.S.A.); Vice-Pres. C. C. Berg (Netherlands), Silvio Zavala (Mexico), K. Kumaniecki (Poland), T. Yamamoto (Japan); Sec.-Gen. R. Syme (New Zealand); Treas. H. Hahnloser (Switzerland); Deputy Sec.-Gen. J. d'Ormesson. Publs. *Bulletin of Information* (biennially), *Diogènes* (quarterly).

Unions Federated to the ICPHS

International Academic Union (*Union académique internationale*), Palais des Académies, 1 rue Ducale, Brussels; f. October 15th, 1919, by representatives of academic institutions from 25 states of Europe, America, Australia and Asia. Object: to promote international co-operation through collective research in philology, archæology, moral history and political and social sciences. Affiliated countries: Australia, Austria, Belgium, Canada, Czechoslovakia, Denmark, Finland, France, Germany, Great Britain, Greece, Hungary, India, Italy, Japan, Mexico, The Netherlands, Norway, Poland, Rumania, Spain, Sweden, Switzerland, U.S.A., and Yugoslavia.

Pres. Prof. Rensselaer W. Lee (U.S.A.); Admin. Sec. Ch. Manneback, Académie Royale de Belgique, Palais des Académies, 1 rue Ducale, Brussels. Publs. Dictionaries of International Law and Medieval Latin, *Monumenta Musicae Byzantinae*, Historical Documents concerning Japan, *Corpus Vasorum Antiquorum*, *Latin médiéval*, *Corpus Philosophorum*, *Corpus Vitrearum*, *Dictionnaire Pâli*, *Corpus des Troubadours*, etc.

International Association for the History of Religions (*Association internationale pour l'histoire des religions*); f. 1950 by the 7th International Congress for the Study of the History of Religions. Object: to promote the study of the history of religions through the international collaboration of all scholars whose research has a bearing on the subject, to organise congresses and to stimulate the production of works. Thirteen member countries.

Pres. G. Widengren, Uppsala; Sec.-Gen. C. J. Bleeker, 290 Churchill-laan, Amsterdam Z, The Netherlands.

International Committee for Historical Sciences (*Comité international des sciences historiques*), Archives Cantonales, Lausanne, Switzerland; f. 1926; int. congresses since 1903 to work for the advancement of historical sciences by means of international co-ordination. Mems. in 36 countries. General assembly every two or three years.

Sec.-Gen. Michel François (France), 270 Boulevard Raspail, Paris 14e. Publs. Congress Reports, *Bulletin d'Information* (1953-61), *Bibliographie Internationale des Sciences Historiques* (1929-39, 1946-59), *World List of Historical Periodicals and Bibliographies*, *Bibliographie des travaux parus en Mélanges*, Vol. I, 1885-1939, *Bibliographie de la Réforme*, *Histoire des Assemblées d'Etat*, *Répertoire des sources de l'Histoire des Mouvements Sociaux*, *Guia de las Personas que cultivan la Historia de America*, *Repertorium der diplomatischen Vertreter aller Länder*, *Excerpta Historica Nordica*.

International Committee on the History of Art (*Comité international d'histoire de l'art*), 3 rue Michelet, Paris 6e, France; f. 1930 by the 12th International Congress on the History of Art. Object: collaboration in the scientific study of the history of art. Mems. in 26 countries. International congress every three years.

Pres. Prof. Millard Meiss (U.S.A.); Sec.-Gen. André Chastel, Sorbonne, Paris, France; Publs. *Répertoire d'Art et d'Archéologie* (annually), *Fichier documentaire de l'Histoire de l'Art*, *Dictionnaire international d'Art et d'Archéologie*, *Corpus internationaux des peintures murales et des vitraux du Moyen Age*.

International Congress of Africanists: c/o Institute of African Studies, University of Ibadan, Nigeria; f. 1960. Object: to develop international co-operation in the field of African Studies through periodic meetings and publications, to organise and promote research on an international basis and to serve as a body which shall encourage Africans to have a growing consciousness of their membership of the human race and to express themselves in all fields of human endeavour.

President K. Onwuka Dike (Nigeria); Vice-Pres. Martin Bakole (Congo-Léopoldville), Georges Balandier (France), Abdelwahab Bouhdiba (Tunisia), Aime Cesaire (Martinique), James Coleman (U.S.A.), Aklilu Habte (Ethiopia), Joseph Ki-Zerbo (Upper Volta), Nicholas Otieno (Kenya), Ivan Potekhin (U.S.S.R.); Sec.-Gen. Nana Kobina, Nketsia IV, Accra, Ghana; Exec. Sec. Michael Crowder, Institute of African Studies, University of Ibadan, Nigeria; Treas. Darryl Forde.

International Federation of the Societies of Classical Studies (*Fédération internationale des associations d'études classiques*), c/o Mlle J. Ernst, 11 avenue du Parc Montsouris, Paris 14e, France; f. 1948 under the auspices of UNESCO. Objects: to encourage research concerning the ancient civilisations of Greece and Rome; to group the main national associations so engaged; to ensure collaboration with relevant international organisations. Mems.: in 28 countries; affiliated bodies include the International Society for Classical Bibliography, International Society for Classical Archæology, International Society for Byzantine Studies, International Association for Latin Epigraphy, International Association of Papyrologists, Unione internazionale degli Istituti di Archeologia, Storia e Storia dell' Arte in Roma, Société d'histoire des droits de l'antiquité.

Pres. Prof. D. Norberg (Sweden); Sec. Mlle. J. Ernst (Switzerland). Publs. *L'Année Philologique*, *Fasti Archaeologici*, other bibliographies, dictionaries, reference works, *Thesaurus Linguae Latinae*, *Thesaurus Linguae Graecae*, *Oxyrhynchus Papyri*, *Lustrum*.

International Federation of Modern Languages and Literatures (*Fédération internationale des langues et littératures modernes*), St. Catharine's College, Cambridge,

England; f. 1928 as the International Committee on Modern Literary History; changed to its present form in 1951. Objects: to establish permanent contact between historians of literature, to develop or perfect facilities for their work and to promote the study of the history of modern literature. Twelve member associations, with members in 71 countries. Congress every three years.

Pres. (1963-66) JOHN ORR (Edinburgh); Sec.-Gen. S. C. ASTON (Gt. Britain). Publs. *Répertoire Chronologique des littératures modernes, Acts of the Triennial Congresses.*

International Federation of Societies of Philosophy (*Fédération internationale des sociétés de philosophie*); f. 1948 under the auspices of UNESCO. Object: to encourage international co-operation in the field of philosophy, and to promote congresses, symposia and publications. Thirty-eight member countries.

Pres. FRANCISCO LARROYO (Mexico); Sec.-Gen. CHAIM PERELMAN, 32 rue de la Pêcherie, Brussels 18, Belgium. Publs. An international bibliography of philosophy, *Husserliana, Chroniques de Philosophie, Philosophy and World Community*, etc.

International Musicological Society (*Société internationale de musicologie*); f. 1927. Object: to promote musicological research, to encourage study in this field and to co-ordinate the work of musicologists throughout the world. Forty member countries.

Pres. VLADIMIR FEDOROV (France); Vice-Pres. DONALD GROUT (U.S.A.), KURT VON FISCHER (Switzerland); Sec.-Gen. ERNST MOHR, 25 Passwangstrasse, Basle, Switzerland. Publs. An international Repertory of Musical Sources, *Acta Musicologica, Documenta Musicologica.*

International Permanent Committee of Linguists (*Comité international permanent des linguistes*); f. 1928. Object: to work for the advancement of linguistics throughout the world and to encourage international co-operation in this field. Eighteen member countries.

Pres. A. SOMMERFELT (Norway); Sec.-Gen. CHRISTINE MOHRMANN, 40 Sint Annastraat, Nijmegen, The Netherlands. Publs. *An International Bibliography of Linguistics, Onoma, Linguistic Atlas, a Linguistic Encyclopaedia*, etc.

UNIVERSITIES

UNIVERSIDAD CENTRAL DEL ECUADOR
(Central University of Ecuador)

GARCÍA MORENO 887, Y ESPEJO 945, CASILLA 166, QUITO

The Central University came into being as a result of the fusion, in 1769, of three institutions of higher learning: the Seminary of San Luis, founded 1594; the University of San Gregorio Magno, founded 1622—both Jesuit institutions; and the Dominican University of Santo Tomás de Aquino. In 1822 the University was reorganised. After undergoing various vicissitudes during the next hundred years, it was granted technical and administrative autonomy in 1925.

Founded 1939.

Organisation. The CNRS proposes to the Government means of doing research and how to allocate funds. The *Comité Mational de la Recherche scientifique* forms the policy of the CNRS and controls 32 sections of 22 members each, covering the Natural Sciences and the Humanities. The total annual budget for 1964 was 336,436,632 francs, and the number of research workers was 4,505.

Objects.

1. To co-ordinate and promote scientific research in all fields.
2. To make grants-in-aid to scientific bodies and to individuals to enable them to carry out research work.
3. To subsidise or set up laboratories for pure or applied research.
